

Make a Splash!

We're constructing a new Community Center building that brings together state-of-the-art planning and design to create a beautiful, vibrant place where all who enter can thrive.

The multi-use pool will be one of the main attractions of the new building.

The pool will accommodate water lovers of all types – from those who like a lazy float to lap swimmers and everyone in between. Swimmers of every age will enjoy a waterslide that winds its way outdoors before coming out onto the deck. For lessons or more competitive pursuits, four lap lanes will be the perfect option. And then there's the interactive water features that are always a big hit.

Lessons, lap swim, play time and more!

Water slide and water features for fun and play

Sauna and whirlpool on deck – accessible even when the pool's closed

Water channel for resistance walking and leisure use

Four lap lanes, great for training, distance swimming, and group exercise

Accessible ramp to lap lanes and zero depth entry for easy entrance for any swimmer

Family changing rooms and adult changing room with transfer hoist

Ability to accommodate current programming

Improved air quality and temperature controls

Watch our website over the coming weeks and months for updates about the multi-use pool and other great building features.
